

SINTALI-SGS ACTS AS A ONE STOP SHOP FOR EDGE

**Certification
Audit services
EDGE Expert consultancy
through a partner
network**

OVERVIEW

Using EDGE certification as proof that an energy efficiency or green building investment is contributing to climate change mitigation, investors can standardise the eligibility criteria for green financial products and report accurately on the CO2 savings of investments.

The minimum 20% improvement over local baselines aligns with standard investor requirements and can help investors channel funds into the energy efficiency/green building sector in a transparent and verified way.

OUR OFFER

- Development of workflow to assess potential investments using EDGE and alignment with existing due diligence processes
- Scalable certification and audit prices for clients
- Consultancy support included as part of all contracts

THE BENEFITS

- Reduce complexity by working with one entity
- Standardise the quality and scope of your consultancy support
- Operate efficiently through a standard approach
- Scale across your investment portfolio, regardless of location/typology of building

NEXT STEPS

- Analysis of existing processes and development of initial work flow
